## **SLIP 2000** Carbon Cutter

AQUEOUS BASED CONTACT CARBON CUTTER  
FOR SMALL ARMS AND WEAPONS SYSTEMS

PRODUCT BULLETIN  
(MIL-X Carbon Cutter)

**SLIP 2000's™ Carbon Cutter** was designed with your health and safety in mind. Unlike other products, this product is non-flammable, non-hazardous and it is biodegradable. Carbon Cutter provides you with a safe effective way to clean carbon firing residue, lead, copper and plastic wad fouling. In addition this product is completely re-usable.

### **CAN BE USED ON:**

All revolvers, pistols, automatic and semi-automatic weapons including: AK47, M16, AR15, MP5 and all Machineguns like the M60 and 240 / 249-SAW.

### **FLASH SUPPRESSERS, SILENCERS AND CANS:**

Dissolves burnt on carbon and will help flush powder and carbon residue out of all cans and suppressors.

### **SIMPLE TO USE:**

Hang dirty parts or completely submerge and allow parts to soak in solution 2 to 15 minutes. Remove parts from solution and wipe or rinse off carbon fouling. It's that easy. Depending on the frequency of cleaning or type of ammo used a second soaking may be required.

For larger parts or barrels on rocket launchers, mortars and tank or heavy artillery that will not fit into containers, soak a nylon brush or rag in Carbon Cutter, apply to area that needs to be cleaned and allow product to set for 2 to 5 minutes. When ready to clean, saturate brush or rag with Carbon Cutter again and wipe or brush away carbon. Parts may also be rinsed clean under hot water.

After cleaning, always re-apply SLIP 2000™ Lubricant to metal surfaces and allow to penetrate pores of metal. SLIP 2000™ will form a barrier and help keep carbon, lead and plastic from sticking. Your next cleaning will take half the time.

May be used in chambers and barrels as a bore cleaner. Apply to cylinder faces, bolt faces and any other hard to clean areas and allow to soak for 2 to 10 minutes. Carbon, lead, copper and burnt powder will wipe clean with a nylon brush. Next cleaning will be much easier with SLIP 2000™ Lubricant/Cleaner. Users will actually be able to wipe carbon and plastic wad fouling away.

### **APPLICATIONS:**

**SLIP 2000 MIL-X** is formulated to meet the complete requirements of cleaning, small and large caliber weapons in virtually all climate conditions.

### **A FEW CURRENT SATISFIED USERS:**

Camp Lejeune, GA	USMC 1 <sup>st</sup> Battalion, 2 <sup>nd</sup> Marines (Currently deployed and using Slip 2000 in Iraq)
Camp Pendleton, CA	USMC Special Ops Command Detachment 1 (Currently deployed and using Slip 2000 in Iraq)
Fort Lewis, WA	US Army 1 <sup>st</sup> Special Forces (Currently deployed and using Slip 2000 in Iraq)
Fort Bliss, TX	US Army 1 <sup>st</sup> Battalion, 84 <sup>th</sup> Infantry (Currently at Ft Bliss, TX)
Hitron Jackson, FL	US Coast Guard Hitron Jackson

# SLIP2000™

LUBRICANTS AND CLEANERS

**Tear down weapon to be cleaned and place all metal parts to be cleaned into basket. Then lower basket of parts into the Slip 2000 Carbon Cutter. Parts should be completely submersed in solution to avoid any corrosion on black steel parts. To avoid evaporation of product, always keep container covered.**

**After soaking for 15–30 min. remove basket from cleaner. Hook on side of can to allow product on parts to drip back into the container. Always keep in mind that if you have not cleaned in 10,000 rounds, it may take a little longer.**

**Remove parts and wipe clean using a cloth or Scotch Brite pad or similar type product on the exterior of parts. You may also rinse under warm or hot water. Hot water will help dry parts quickly. You can blow dry or allow to drip dry also.**

## ***How is this for clean?***

***Apply Slip 2000 Lubricant to all parts and allow it to penetrate into metal parts. This will help displace any moisture left behind from cleaning and it will also help keep carbon from sticking. Cleanup will take half the time if cleaned on a regular frequency.***
